Exercise 3 - Multi Get Keys

Exercise 3.a - Retrieve the Recent Products

Open exercise3/com/example/ProductService.cfc in your IDE

Modify the getRecentProducts method to retrieve the recent_products by calling the CFCouchbase get() method. The document is structured as follows:

```
{
   "doc_type": "config",
   "products": [
        "db2f3494-c030-491b-ab179c32d98b1345",
        "5d1c4462-f69d-4fe6-bddc4397c165fca9",
        "bda46f2c-2a07-44f3-afbd8738aa25cccc",
        "91f2683e-a79b-4002-8b2daf1fd4aa6672",
        "7d944f17-db36-4948-b90d582a067ed714",
        "858d0489-bb8d-4c4f-a9c875310c39e0b7",
        "4825b83f-9ae8-4361-93ff48faed868cb5",
        "de87c930-67d3-49d3-b1fcda43b9231c88"
]
}
```

After you have retrieved the recent_products document, call the CFCouchbase getMulti() method passing it the array of products. This will return you a structure of each document with each key being the Document ID.

For your reference the data from the getRecentProducts method is used in the following views:

- exercise3/view/includes/home.recent.cfm
- exercise3/view/includes/template.product.cfm

Open the homepage (/exercise3/index.cfm) and verify that the New Products are displaying correctly.

Exercise 3.b - Retreive the Sale Products

Open exercise3/com/example/ProductService.cfc in your IDE

Modify the getSaleProducts method to retrieve the sale_products by calling the CFCouchbase get() method. The document is structured as follows:

```
{
    "doc_type": "config",
    "products": [
        "18099658-70d7-4c0e-be1f1ca0d3f07642",
        "451f05ff-c881-4cbb-b6e4edd619c87da7",
        "f5a70d7e-fd7c-4711-ab5b2e4019e13315",
        "27fc7858-3b1d-467d-b4d1feaaa89b0c5c",
        "88559b29-12ba-4066-baf2d42e81567a00",
        "7dfbbb40-4c2c-4ca6-95c8c7c024b987a4",
        "9f6ef86d-e9e1-4f55-884b499e16081147",
        "71578029-5fc8-49ba-a5288dbce8d4a0d8"
]
}
```

After you have retrieved the sale_products document, call the CFCouchbase getMulti() method passing it the array of products. This will return you a structure of each document with each key being the Document ID.

For your reference the data from the <code>getSaleProducts</code> method is used in the following views:

- exercise3/view/includes/home.sale.cfm
- exercise3/view/includes/template.product.cfm

Open the homepage (/exercise3/index.cfm) and verify that the Sale Products are displaying correctly.
